

## SM 3300 - Series 3300 W DC POWER SUPPLIES

### One or Three phase input

| Models                             | Voltage range          | Current range          |
|------------------------------------|------------------------|------------------------|
| SM 18-220                          | 0 - 18 V               | 0 - 220 A              |
| SM 66-AR-110<br>Autoranging output | 0 - 33 V<br>0 - 66 V   | 0 - 110 A<br>0 - 55 A  |
| SM 100-AR-75<br>Autoranging output | 0 - 50 V<br>0 - 100 V  | 0 - 75 A<br>0 - 37.5 A |
| SM 330-AR-22<br>Autoranging output | 0 - 165 V<br>0 - 330 V | 0 - 22 A<br>0 - 11 A   |
| SM 660-AR-11<br>Autoranging output | 0 - 330 V<br>0 - 660 V | 0 - 11 A<br>0 - 5.5 A  |

### Features

- Designed for long life at full power
- Excellent dynamic response to load changes
- Protected against all overload and short circuit conditions
- EMC surpasses CE requirements: low emission & high immunity
- Low audible noise: fan is temperature controlled
- Available Options : Software control and Interfaces, High Speed Programming, Two-Quadrant Output - PowerSink

### Functionalities

- Operation on single and three phase input voltages
- Standard Ethernet interface
- Large user display, menu driven operations
- Durable digital encoders for voltage and current adjustment
- Plug and play optional interfaces

| <b>Weight</b>  | 15 kg   |

- Notes: 1. Measured at full load  
2. Signal latency depends on the interface used and data traffic.  
3. See 'Safety Instructions' in the manual.  
4. With optional 'plug and play' interface. (Not yet available)

CV= Constant Voltage  
CC= Constant Current

Specifications measured at  
T<sub>amb</sub> = 25 ± 5 °C and Vin = 400 VAC,  
50 Hz, 3 phase, unless otherwise noted.

The information in this document is  
subject to change without notice

## Typical Applications

- Solar inverter testing, PV-Simulation
- Car testing systems
- ATE in industrial production lines
- Plasma chambers
- Automotive battery simulations
- Controlled battery (dis)charging
- Lasers
- Driving PWM-Controlled DC motors
- Accurate current sources
- Aerospace and military equipment

## Standard Features

### Digital Voltage and Current Settings

Reliable, longlife digital encoders are implemented at the front panel. Includes total front panel lock (also for CV- / CC-knobs) and a coarse or fine pitch adjustment depending on the turning speed.

### Ethernet Controller

Ethernet interface for programming and monitoring.

### Sequencer

Arbitrary Waveform generator or standalone automation.

### High Voltage Isolation

A high output isolation allows series operation up to 1000 V for low voltage units and up to 1400 V for high voltage units.

### USB-Input

Under development:  
Front panel USB-Input for exchange of settings and waveforms (Host).

## Available Options

### Software Control and Interfaces

Field installable interfaces :

- Isolated Analog Programming
- Digital I/O
- Isolated Contacts
- Serial controller with multiple protocols RS 232, RS 485, RS 422 and USB (Device)

Order Codes :

- INT MOD ANA
- INT MOD DIG
- INT MOD CON
- INT MOD SER

Under development:

- Master / Slave Controller.

### High Speed Programming

A 10 to 20 times higher programming speed (down to 0.2 ms rise time at full load) and lower output capacitance. Excellent for laser applications, test systems or as current source with low parallel capacitance as used in plasma chambers.

Order Codes :

- SM 18-220 - P300
- SM 66-AR-110 - P302
- SM 330-AR-22 - P304
- SM 660-AR-11 - P305

Under development:

- SM100-AR-75 - P303.

### Two-Quadrant Output Power Sink

Two quadrant operation maintains the output voltage constant regardless the output power is positive or negative. Ideal for PWM-speed controlled DC-Motors and ATE systems.

Order Codes :

- SM 18-220 - P306
- SM 66-AR-110 - P308
- SM330-AR-22 - P310
- SM660-AR-11 - P311

Under development:

- SM100-AR-75 - P308

**Safety Covers supplied for in- and output (not shown)**
